

NON-DESTRUCTIVE TESTING

Why start a career in NDT?

- NDT technicians are the first line of defense against failing infrastructure and equipment, preventing plane crashes, train derailments, oil spills, and other critical infrastructure failures.
- The field of NDT is exciting, supporting aerospace, shipping, construction, oil and gas, petrochemical, nuclear, automotive, as well as other industries.

Why choose the American Aerospace Technical Academy?

The AATA offers the most advanced training in the industry.

The AATA has the only nationally recognized NDT apprenticeship program.

Most individuals qualify for funding or scholarships. There are special programs for vets, the unemployed, and underemployed. However, anyone who is interested may attend.

The AATA is recognized by the GI Bill. Both veterans and non-veterans at or below the poverty line can train free of charge.

Demand for qualified NDT workers is already strong and shows no signs of slowing.

Day class begin in February 2024 8:00 AM- 4:00 PM

Location: Houston Texas at 912 Gemini Street, Houston, Texas 77058.

90% of our students successfully complete the program and more than 80% receive job offers. Contact the AATA today!
